

Cernit Gnome - A step by step tutorial.

To make these you need, porcelaineclay in red, black and skintoned color.

1. We start with the shoes (I did not have anymore black so I had to make red)

Make 2 small balls with black, around 1 cm in diameter.

2. Shape the shoes by pressing down half the ball like this

3. Assemble the shoes like this

4. Make up one large ball and one smaller ball in skintone. The large one should be about 2-3 cm in diameter and the small one about 1 cm in diameter.

5. Put the large ball on top of the shoes

6. Place the small ball (nose) on the large ball

7. make a red ball about 2-3 cm in diameter.

8. Roll the ball in to a cone shape.

9. shape the hat by pressing the thickest part into a brim like in the picture.

10. Keep shaping the brim till it looks somewhat like this.

11. Place the hat on top of the head and make sure the brim is all the way down to the nose.

12. Twist the top of the hat a bit.

13. and then bend it over to one side if you feel like it.

14. Voila, your gnome is done..

15. Bake in the oven as stated on the wrapping that the clay came in.

16. Let to cool.

17. If you want to have beards on the, put some glue around the nose and stick on some wool.
